

VINAY KUMAR

Android & Flutter Developer

+91-8953852101 / +91-7011823847 · vk222992@gmail.com / vinaytiwari7011@gmail.com

Gurugram, India · [LinkedIn](#) · [Portfolio](#) · [GitHub](#)

PROFESSIONAL SUMMARY

Android & Flutter Developer with 3+ years of experience building and delivering production-grade mobile applications from concept to Play Store. Expertise in Flutter, Android (Java/Kotlin), MVVM, BLoC, Firebase, and REST APIs with a focus on scalable, maintainable architecture. Specialized in enterprise mobility solutions — HHT scanning (Zebra EMDK, DataWedge, Honeywell, Newland NLS SDK), Bluetooth printing (ESC/POS, ZPL), and ERP integration. Proven ability to own features end-to-end, collaborate with cross-functional teams, and ship reliable applications across logistics, warehouse management, and enterprise platforms.

TECHNICAL SKILLS

Mobile Development	Android (Java, Kotlin), Flutter, Dart, Cross-Platform Development
Architecture	MVVM, BLoC, Riverpod, Provider, GetIt, GoRouter, Freezed, Repository Pattern, Clean Architecture, SDLC
Backend & APIs	REST APIs, Dio, Firebase (Auth, Realtime DB, Cloud Messaging, Cloud Functions, Analytics), Google Maps, Geolocation, Webhooks, Push Notifications
AI / ML	Google ML Kit, TensorFlow Lite, MobileFaceNet (On-Device Face Verification), OCR
Enterprise / HHT	Zebra EMDK, DataWedge, Honeywell SDK, Newland NLS SDK, Cipherlab
Hardware & Printing	Bluetooth Communication, ESC/POS, ZPL, Barcode / QR Scanning
Data Storage	Room Database, SQLite, Hive, Shared Preferences, flutter_secure_storage, Offline-First Architecture
Tools	Git, Postman, Android Studio, Docker, Play Store Deployment

WORK EXPERIENCE

Android Developer

Sat Kabir Logistics – Gurugram, India

Apr 2026 – Present

- Leading Android/Flutter development on SKL-WMS, a production warehouse management system live on Google Play — covering vehicle gate entry, inward/GRN verification, putaway, inventory tracking, Physical Inventory Verification (PIV), and outbound dispatch.
- Built KBR TMS, a multi-portal Transport Management System for KBR Transways and SKL spanning the full freight lifecycle — indent, vehicle placement, live GPS tracking, POD, invoicing/billing, and BFC/THC approvals — across 100+ REST API endpoints.
- Engineered Precast ERP's on-device face verification pipeline (Google ML Kit + MobileFaceNet + TensorFlow Lite), generating 128D face embeddings for biometric gatepass verification without uploading raw images.
- Developing SKL HRMS, a workforce management platform with biometric camera gate-in/out and GPS/geocoding-based location-aware attendance validation.
- Architected MVVM + Clean Architecture with Repository pattern and clean code principles, reducing feature development time by 30%.
- Integrated RESTful APIs, Firebase Cloud Messaging, and offline-first caching (Hive, Room, SQLite) for real-time data sync and resilience across ERP, WMS, and TMS platforms.

Tech Stack: Android, Flutter, Dart, Kotlin, Java, Riverpod, Provider, GetIt, Hive, Google Maps, Firebase, TensorFlow Lite, ML Kit, Newland HHT, REST APIs, Room/SQLite, Git

Software Developer (Android & Flutter)

Seabird Logisolutions Pvt. Ltd. – India

Jul 2023 – Apr 2026

- Engineered and deployed 7 production-ready Android and Flutter applications used daily by 50–200 field staff and enterprise clients across logistics and warehouse operations.
- Built HHT-based barcode and QR code scanning workflows using Zebra EMDK, DataWedge, and ML Kit — reducing manual shipment verification time by 25–50%.
- Architected MVVM-based applications using Flutter (Provider, BLoC) and native Android (Java/Kotlin) for scalable, maintainable codebases.
- Implemented Bluetooth printing with multi-printer support (ESC/POS, ZPL) across Zebra and Honeywell HHT devices.
- Built Proof of Delivery (POD) module with image capture and real-time REST API synchronization.
- Integrated Firebase for authentication, real-time data sync, push notifications, and analytics.
- Collaborated with cross-functional teams to own features end-to-end from design through Play Store deployment.

Tech Stack: Android, Flutter, Dart, Java, Kotlin, MVVM, BLoC, Provider, Firebase, REST APIs, Zebra EMDK, DataWedge, Honeywell SDK, Bluetooth Printing, ML Kit, Room/SQLite, Git

KEY PROJECTS

Current Projects — Sat Kabir Logistics

SKL-WMS (Warehouse Management System)

Sat Kabir Logistics — [Live on Google Play](#)

- Built an end-to-end warehouse execution system covering vehicle gate entry, inward/GRN verification, putaway, inventory tracking by bin and SKU, and outbound dispatch.
- Implemented multi-stage shipping approval workflows and Physical Inventory Verification (PIV) for cycle counting and audits.
- Built multi-mode scanning with native Newland hardware and camera fallback, plus voice-guided operations via Text-to-Speech.
- Developed real-time MIS dashboards with daily/monthly analytics, native PDF viewing, and Excel exports.

Tech Stack: Flutter, Dart, Riverpod, Provider, Dio, REST APIs, Newland Barcode SDK, Firebase, Syncfusion PDF, FL Chart

KBR TMS (Transport Management System)

Sat Kabir Logistics — [Live on Google Play](#)

- Built a multi-portal transport management platform for KBR Transways and Sat Kabir Logistics covering the full freight lifecycle: indent → vehicle placement → trip → tracking → POD → billing → settlement.
- Implemented live fleet tracking via Google Maps, digital Proof of Delivery capture/upload, and customer/supplier billing with BFC and THC approval workflows.
- Built Hive-based offline caching, Firebase Cloud Messaging for real-time dispatch alerts, and remote session termination for security.

Tech Stack: Flutter, Dart, Provider, Riverpod, Hive, Dio, REST APIs, Google Maps, Firebase FCM, Secure Storage

Precast ERP

Sat Kabir Logistics — [Live on Google Play](#)

- Built an industrial ERP digitizing the precast concrete production lifecycle — batch management, mold scanning, curing/WIP tracking, QC approval workflows, procurement (PO/GRN), and dispatch.
- Engineered an on-device face verification pipeline (Google ML Kit + MobileFaceNet + TensorFlow Lite) generating 128D face embeddings for biometric gatepass verification without uploading raw images.
- Implemented enterprise in-app APK distribution, Newland HHT barcode scanning, and automated PDF/Excel report generation.

Tech Stack: Flutter, Dart, Riverpod 2.x, TensorFlow Lite, MobileFaceNet, Google ML Kit, PHP REST API, Firebase FCM

SKL HRMS (Human Resource Management System)

Sat Kabir Logistics — *In Production*

- Building a mobile workforce management platform with Feature-First Clean Architecture, featuring biometric camera gate-in/out and GPS/geocoding-based location-aware attendance validation.
- Developing leave management, payslip/payroll UI, and a telemetry dashboard; scaffolding shifts, manager approvals, and performance review modules.
- Architected with Riverpod 2.x (code generation, autoDispose), GoRouter, and GetIt for a backend-agnostic, API-ready structure.

Tech Stack: Flutter, Dart, Riverpod 2.x, GoRouter, GetIt, Geolocator, Geocoding

Previous Projects — Seabird Logisolutions

WMS-GNOSIS (Warehouse Management System)

Seabird Logisolutions — *Production Deployed*

- Deployed a full-stack WMS across 3 warehouses handling 500+ daily scan operations — covering inbound, putaway, picking, and shipment workflows with real-time inventory tracking.
- Built barcode automation for inbound receipt and putaway, and real-time bin-level inventory verification.
- Integrated Bluetooth thermal printing (ESC/POS & ZPL) for label and sticker generation.

Tech Stack: Flutter, REST API, Provider, Honeywell & Zebra Scanners, ZPL & ESC/POS Printers, SQLite, WebSocket, Docker

Visitor Management System

Seabird Logisolutions — [Live on Google Play](#)

- Built an enterprise visitor entry system with contactless face recognition and QR code identity verification for check-in.
- Implemented multi-tier visitor entry request and manager approval workflows with digital gate pass generation and audit trails.
- Integrated Firebase Cloud Messaging for real-time host notifications on visitor arrival.

Tech Stack: Flutter, Face Recognition, REST API, Camera SDK, QR Scanner, Firebase, ML Kit

Expense Management System

Seabird Logisolutions — [Live on Google Play](#)

- Built an in-house expense tracking platform with ML-powered OCR bill reading for automated receipt data extraction.
- Implemented multi-tier expense submission, receipt attachment, and manager approval queues with strict client-side validation.
- Integrated Cloud Functions for automated receipt processing.

Tech Stack: Java, Kotlin, ML Kit, OCR, REST API, Firebase, Cloud Functions, SQLite

SLL Ticketing System

Seabird Logisolutions — [Live on Google Play](#)

- Built an internal IT ticket management platform used by IT-Infra teams across Pan India, covering automated incident routing and multi-tier ticketing.
- Implemented role-based dashboards for support engineers and infrastructure leads, with SLA-monitored ticket lifecycle tracking.
- Delivered real-time status updates and notifications via Firebase.

Tech Stack: Flutter, Provider, Firebase, REST API, Cloud Functions

PERSONAL PROJECTS

BillNova (Business Management & POS System)

Personal Project

- Built a Flutter POS and business management app using Feature-First Clean Architecture across auth, POS, sales, and dashboard modules.
- Designed a full analytics dashboard (KPI widgets, sales charts, stock alerts) and an invoice detail screen with payment tracking.

Tech Stack: Riverpod, Freezed, GoRouter, Hive, Flutter Secure Storage, fl_chart

Enterprise-WMS-Flutter (Open Source Warehouse Management System)

Personal Project (MIT License) — github.com/VinayTiwari023/enterprise-wms-flutter

- Built a warehouse management app with Clean Architecture (Feature-First), MVVM, GetIt, and Riverpod.
- Authored a structured technical handbook documenting enterprise Flutter architecture decisions.

Tech Stack: Flutter, Dart, Riverpod, GetIt, Clean Architecture

EDUCATION

Bachelor of Computer Applications (BCA)

2021 – 2024

Invertis University, Bareilly

12th – CBSE (English)

2021

CBSE Board | Marks: 88%
